## WATERFLEX™

One-Component Waterproofing and Crack Isolation Membrane

### Product Summary

HENRY Waterflex is an easy-to-use, single-component, load-bearing waterproofing compound that produces a flexible, positive-side waterproof coating. Waterflex is for use over concrete, masonry finishes, existing tile, drywall, plaster, cementitious backerboards and plywood on interior floors and walls.

### Product Highlights

- Flexible, topside waterproofing for interior floors and walls
- Use for bathrooms, showers and other wet areas
- Very easy-to-apply, 2-coat system – Install with a paint roller or brush!
- Crack isolation up to 1/8" (3 mm)
- Flood test in 12-24 hours
- Highly workable consistency; minimal drips and splatters

### Coverage Rates

3.5 gal. (13 L) unit - 195.5 sq. ft. (18 sq. m)

2 coats over drywall

1 gal. (3.79 L) unit - 56.75 sq. ft. (1.36 sq. m)

2 coats over drywall
