HENRY® 1172

Acrylic Urethane Engineered Wood Flooring Adhesive

Product Summary

HENRY 1172 is a high-solids, acrylic-urethane adhesive used for almost all types of interior engineered wood flooring that are recommended for glue-down installations. HENRY 1172 is extremely moisture resistant and has excellent ultimate bond strength while maintaining the elongation characteristics necessary to allow for some wood movement.

Product Highlights

- Excellent initial grab
- Fast strength development
- High solids acrylic-urethane
- Anti-microbial product protection
- Enhanced moisture & alkali resistance
- High ultimate bond strength & elongation
